

NGUYEN HOANG THAI SANG

BUSINESS ANALYST INTERN

CONTACT INFORMATION

EDUCATION

University of Finance - Marketing
Major: Management Information Systems
Specialization: Management Informatics
GPA: 3.59 / 4.0

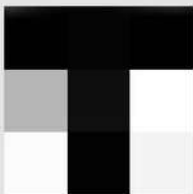

SKILLS

- **Programming Languages:** C++, C#, SQL, Python.
- **Microsoft Office Suite:** Word, Excel, Access, Power Point.
- **Tools:** Figma, SQL Server, draw.io, Google Analytics, Power BI.
- **Soft Skills:** Presentation, teamwork, time management, communication, and customer requirement gathering.

LANGUAGES

- English.

PORTFOLIO

CAREER OBJECTIVE

A Management Information Systems student with hands-on experience in end-to-end business analysis — from requirements elicitation and process modeling (BPMN, BFD, DFD,...) to SQL database design, object-oriented analysis and design (OOAD) and implementation. Seeking a Business Analyst Intern role to apply analytical thinking and technical skills in real-world IT projects, with a focus on process optimization and data-driven solutions.

ACHIEVEMENTS

- Awarded "Excellent" Scholarship** 2024 - Present
Highest achieved GPA: 3.92
- Organizing & Communications Member of EMIS Club** 2023 - Present
Planned events and produced promotional content for academic programs.

ACADEMIC PROJECTS

Course Project: SQL Database Management Systems (GPA: 3.7) 11/2025

Topic: Database Management for Phuc Long's Management Systems

Responsibilities:

- Utilized T-SQL to implement the physical data model, integrate functions.
- Programmed software to automate core business processes (order creation, total cost calculation, inventory updates, etc.) in real-time.

Results:

- Designed and implemented a full relational database for Phuc Long's purchase management system, covering 6 modules (purchasing needs, suppliers, purchase orders, warehouse receiving, payments, reporting), with complete ERD, physical/logical data models, integrity constraints.
- Programmed 25+ T-SQL objects (5 Stored Procedures, 5 Triggers, 5 Functions, 5 Views, 5 Indexes, 2 Transactions) to automate core operations such as inventory updates, order cost calculation, and supplier debt tracking — reducing the need for manual data entry.

Course Project: Business Analysis (GPA: 4.0) 11/2025

Topic: Business Analysis for Phuc Long's Sales Management

Responsibilities:

- Applied analytical techniques (SWOT, BACCM, Business Model Canvas) to assess the current state of the enterprise.
- Utilized models (BPMN, ERD, BFD) to visualize business processes.

Results:

- Conducted end-to-end business analysis for Phuc Long's sales management system, producing AS-IS/TO-BE models (BPMN, BFD, DFD), SWOT, BACCM, and a full Business Requirements Document (BRD) covering 6 functional modules and 60+ use cases.
- Identified 12 operational bottlenecks (manual order transfer, no KDS/OMS integration, Excel-based accounting), proposed a digital transformation roadmap projected to reduce average order processing time from 4 min to ≤ 1.5 min, cut operational error rate from 8-12% to $\leq 1\%$.

Le Nguyen Viet Hung

Backend Developer Intern

Profile

- 📞 05741155
- ✉️ 8***@gmail.com
- 📧 lenguyenviethung412005@gmail.com
- 🌐 <https://github.com/LeeDuckHung>
- 📍 Vinh Loc, Binh Hung Hoa B, Binh Tan, Ho Chi Minh City

Languages

English: Intermediate (good reading comprehension, basic communication)

Softskills

Teamwork and collaboration
Time management
Self-learning and adaptability

Interests

Badminton, Volleyball, Running

Objective

As an Information Technology student with a strong passion for learning (awarded scholarships for 5 consecutive semesters), I am eager to work in a professional environment where I can gain practical experience, enhance my programming skills, and grow into a professional software developer. I aim to contribute meaningful value to both the organization and society.

Education

Information Technology 2023 - 2027 (Expected)

Ho Chi Minh City University of Industry and Trade (HUIT)

- GPA: 3.84/4.0
- **Excellent Student Scholarship:** Awarded for 5 Consecutive Semesters

Skills

- Frontend** Flutter, HTML, CSS, JavaScript, Razor (.cshtml).
- Backend** Java Spring Boot, ASP.NET MVC, RESTful API, JWT Authentication.
- Database** MySQL, SQL Server, JPA/Hibernate, Entity Framework
- Deploy:** Railway
- Tools & Others** Git/GitHub, Postman, Figma.

Projects

Badminton Court Booking Application 5/2026 - Now

Role: Full-stack Developer

- Developed a badminton court booking mobile application using **Flutter**, **Spring Boot**, and **MySQL**.
- Built **RESTful APIs** for communication between frontend and backend.
- Implemented **JWT authentication & role-based authorization** for secure login and API access.
- Deployed **backend and MySQL database on Railway** and connected cloud APIs to the mobile app.
- Used **Git & GitHub** for version control, source code management, and deployment workflow.

Github: <https://github.com/LeeDuckHung/badminton-booking-app>

Bach Hoa Xanh E-commerce Website 10/2025 - 12/2025

Role: BE Dev

- Developed a retail management web application using **ASP.NET MVC** for product, inventory, invoice, and membership management.
- Implemented **role-based authentication** for admin, staff, and user.
- Built **CRUD operations**, inventory tracking, invoice processing, search/filter, and pagination features.
- Applied **Entity Framework & LINQ** for database management and query handling.
- Collaborated on **UI design using Figma** and used **Git/GitHub** for version control.
